

Frontier Communications has a public right-of-way permit to bring their lines to all streets of NRB.

If you experience a service interruption of any of your utilities (Electricity, Gas, Spectrum or Water), please call the service provider directly to report the interruption or outage.

If your property experiences any issues related to the work, please call Lambert's Cable Splicing Company at 1-888-616-6305 or email ftfrldrops@lambertcable.com.

This project will eventually give NRB residents a new option with their communication services.
