

UPDATE: REVISED DEBRIS REMOVAL GUIDELINES 10/05/2024

Please be advised that all small items (including building debris) must be bagged for pickup. Anything that could float away during a rain event must be secured to prevent it from collecting in our storm drains which will cause street flooding with the coming rains this weekend. Please advise all contractors and recovery companies to bag the small items including drywall.

Thank you for attention to this matter.
