NRB PARKING

NOTIFICATION

Yesterday the Board of Commissioners discussed and agreed to reinstate the enforcement of parking on only one side of the residential streets.

Historically the streets have always been restricted due to the narrowness. However, enforcement was temporarily lifted after the 2024 storms due to the tremendous amount of construction.

While there is still much work throughout town, during the two year grace period many homes have been completed and the safety issue outweighs the need for additional parking. The town has been receiving many complaints about vehicles parked in such a way that larger vehicles, including emergency vehicles, cannot pass.

Therefore effective November 1st, 2026 parking will be limited to one side of the street. All streets have signs posted designating the side that is restricted, the majority of which is the south side. Also, cul-de-sacs that are posted no parking will also be enforced.

Please let your contractors know to make alternate plans for parking such as parking on the construction site or carpooling. Also, please ask them to be aware of your neighbors by not blocking driveways and mailboxes.

Between now and November 1st, notices will be placed on vehicles parked on the restricted side alerting them to the change and notification that they will be ticketed if in violation after the 1st.

We appreciate everyone's cooperation and understanding of the need to reinstate this parking enforcement while we work together to ensure the safety of all residents.
